Hello, I'm Artem Saibel

Frontend developer

I'm a student of Unicorn University. My field field of study is Software Engineering and Big Data. I worked in a group on a school project with an frontend, backend and business models. Therefore, I have something to offer in every part of web application development. At the moment I'm focusing on Frontend development.

Technical skills

Typescript	Node.js
React	Figma
Git	<🤳>
HTML5 & CSS3	

Education and Experience

Unicorn University

September 2021 – present

Master of Software Engineering and Big Data

Newton University

September 2016 – Sep 2019

Bachelor of Business Economics and Managment

IT-Absolvent, SmartBrains

Jun 2022 — Sep 2022

I have completed a 10-week Ita 2022 course. Part of the course were lectures every week and home projects on the topics covered. The workflow was close to real development, with code checking, creating projects on separate branches in git and merging to the main repository after passing the review.

KYC Analyst

Sep 2019 — Jan 2021

Monitoring of data in internal analytical software to check for possible violations in the field of AML
